Objective

NetSuite certified ERP consultant focused on scalability with extensive experience in implementations, configurations, customizations, and integrations seeking to apply NetSuite, accounting, finance, and executive expertise to streamline an organization's operations and develop them into scalable and adept companies.

Education

University of Minnesota, Twin Cities

Bachelor of Science in Mathematics, Business management minor

Strengths

- | | |
|--|--|
| • NetSuite implementations and optimizations | • Executive insight & decision making |
| • Data analysis, reporting, and migration | • NetSuite optimization & enhancements |
| • Process analysis for future state targets | • Offshore team management |
| • NetSuite finance & accounting best practices | • B2B and B2C sales |
| • Integration design and architecting | • Dedicated focus on scalability |

Competitive Advantages

- 12 years' experience with NetSuite implementations and consulting
- Experience with NetSuite OneWorld including multi-book accounting and finance
- Strong proficiency in NetSuite customizations including SuiteFlow, advanced PDFs, custom records, and script design
- Form and dashboard customization, data imports, reporting, KPIs, and saved searches
- Specialty in 'hacking' the system with workarounds and customizations to achieve necessary requirements
- Anticipation of business growth and change behind each design decision to ensure NetSuite scales with companies' changing needs

Mission Statement

Everything I design for clients is done with scalability and flexibility in mind, so NetSuite never becomes one of the limitations.

Experience

Nerdz @ Work Consulting

November 2018 – present

Independent NetSuite Consultant

- Worked directly with key decision makers on implementations, optimizations, financial-heavy customizations, SODs, permissions, documentation, Sales Force, integrations via Boomi and Celigo Integrator IO, workflows, electronic payments, solution architecting
- Assisted in the design and development of integrations and custom solutions that provided complex challenges with extensive limitations. Liaisoned between functional and technical resources
- Created numerous custom solutions for clients with Suite Script to achieve business-specific requirements

Westrock Coffee / S&D Coffee and Tea

May 2023 – August 2023

Contract NetSuite Consultant

- Collaborated with various departments to design and establish a blueprint to connect thermal printers with databases to query data from NetSuite. Master data from NetSuite was integrated into an on-premise server with an SQL database, where label printing software queried data to render customer-specific label designs to post on products delivered to customers

MorganFranklin Consulting
NetSuite Consultant

December 2020 – April 2023

- NetSuite consultant working with clients to integrate business-specific operational software with NetSuite for financial reporting. Worked with client and company executives to solution integrations and develop simple and scalable custom solutions to meet client objectives

Clover Group and Teknik Trading, Miami, FL / Los Angeles, CA
Corporate NetSuite Consultant

April 2015 – August 2020

- Optimized existing NetSuite instance and user interaction to increase productivity through fitting business processes in the scope of NetSuite native functionality with extensive configuration and customization
- Developed new processes, reports, workflows, and procedures for existing business while upgrading and deploying additional subsidiaries on a OneWorld instance
- Worked with external consultants to integrate NetSuite with industry standard transportation and logistics software to share financials between systems
- Worked with development consultants to create extensive scripted customizations tailored to Clover and Teknik requirements

Celigo, San Francisco / Los Angeles, CA
Implementation Consultant

May 2013 – April 2015

- Responsible for collecting client's business requirements and creating a requirements document
- Worked in a multiple project environment, managing multiple NetSuite implementations simultaneously
- Lead requirements gathering meetings, wrote business requirements documents, performed client configuration sessions, and assisted in user acceptance testing and training
- Created scoping documents for customizations requiring scripting

Sererra, Irvine, CA
NetSuite Implementation Analyst

November 2012 – March 2013

- Configured NetSuite software per client specifications
- Lead implementation sessions with client oversight
- Cleaned data, configured custom records, set up preferences, and determined best course of action for configuration

Accenture, Minneapolis, MN
NetSuite Implementation Analyst

April 2012 – November 2012

- Gathered, mapped, and analyzed current state business processes with future state gap analysis with NetSuite system integrations
- Managed client expectations through rigorous, thorough documentation, change management, and action item take-aways
- Collaborated with off-shore teams to create extensive customizations to meet and exceed client requirements

Forward Hindsight, Bloomington, MN
Implementation Consultant

October 2010 – March 2012

- Worked closely with project managers and other implementation specialists to complete implementations on time and within budget
- Gathered and analyzed business requirements, drafted design documents, and implemented NetSuite services within the required scope and statement of work
- Configured individual NetSuite account preferences, customized forms, reports, and user preferences, imported data, and provided training and post go-live technical support
