

Anouar Zouhri

📍 Fez, Morocco 🇲🇴 Moroccan ✉ anwarzouhri66@gmail.com 📞 +212 7 72 90 06 46 🌐 anouar-zouhri.netlify.app

Education

Master's in Big Data and IoT National Institute of Posts and Telecommunications (INPT), Rabat, Morocco Honours: Good	<i>2023 – 2025</i>
Professional Bachelor's Degree – Mobile Applications Engineering Higher School of Technology, Sale, Morocco Honours: Good	<i>2022 – 2023</i>
University Diploma of Technology – Networks and Telecommunications Higher School of Technology, Fez, Morocco Honours: Good	<i>2020 – 2022</i>

Technical Skills

Programming Languages: Python, C, Java, JavaScript, SQL, HTML, CSS, PHP, Dart
Networking: Routing (RIP, OSPF, EIGRP, BGP, MPLS), VLAN, NAT, ACL, DMZ, OSI/TCP-IP, DHCP, DNS, IPv4/IPv6, WAN, VPN, Proxy
Signal and Transmission: Analog/Digital Transmission, RF and Microwave Transmission, Signal Processing, FDMA, CDMA, TDMA, WDM, Source and Channel Coding
Telecom and Networks: Enterprise Networks, Mobile Networks (2G–5G), Optical Fiber (FTTH, FTTA, FTTX), Firewall (PFSense), Captive Portal, OpenVPN, Network Security, Intrusion Detection
Cybersecurity: Traffic shaping, network segmentation, ML-based anomaly detection
Collaborative Tools & Agile Methods: Git, GitLab, Jira, Trello, Scrum, UML, Figma

Tools and Software

Eclipse, VSCode, Android Studio, Firebase, Linux, Packet Tracer, GNS3, Wireshark, Cisco IOS, SQL Server, MySQL, Xcode, PowerAMC, Canva, Figma, Photoshop
--

Languages

Arabic: Native
French: Fluent (C1)
English: Fluent (C1)

Professional Experience

NetSuite Administrator & SuiteScript Developer – Suitevise Manage and customize NetSuite ERP through SuiteScript development and system administration. Develop SuiteScript (2.x) solutions, SuiteQL queries, Saved Searches, and custom integrations. Design and implement automation workflows using Make (Integromat), REST APIs, SQL Server, and SFTP. Integrate NetSuite with third-party platforms (HubSpot, HRIS, Finance systems), ensuring secure and reliable data synchronization.	<i>Sep 2025 – Present</i>
Technical Trainer – EPG Fès (École Polytechnique des Génies) Delivered training courses for students in higher technical programs. Taught Big Data fundamentals, Data Analytics with Python, Merise methodology, Artificial Intelligence concepts, and Arduino programming. Prepared practical workshops and guided students through hands-on projects to strengthen their technical and analytical skills.	<i>Oct – Dec 2025</i>
Final Year Project (INPT) – Rabat Intelligent assistant for WiFi troubleshooting using Large Language Models (LLMs). Built a custom WiFi dataset, fine-tuned models, and integrated Retrieval-Augmented Generation (RAG) for reasoning and diagnostics.	<i>Feb – Jul 2025</i>

Internship – 2MSYNERGY, Fez

Apr – Jun 2023

Built two Flutter applications: an e-learning platform and a real-time package tracking app using Firebase and barcode scanning.

Internship – INFODIS, Fez

Apr – Jun 2022

Implemented a PFSense firewall with captive portal, OpenVPN, and network traffic monitoring and management.

Introductory Internship – INFODIS, Fez

Jun – Aug 2021

Hands-on experience in network cabling, infrastructure setup, and hardware maintenance.

Academic Projects

- **Blockchain-Secured Decentralized Federated Learning for TinyML Systems (INPT):** Developed an innovative solution integrating decentralized federated learning and blockchain to secure and optimize AI on low-power TinyML devices.
- **Attack Detection (INPT):** Compared 5 ML models (Logistic Regression, Random Forest, KNN, XG-Boost, Decision Tree) on the UNSW-NB15 dataset to perform binary and multiclass classification for attack detection. [Attack Detection notebook](#)
- **Radio Modulation Classification (INPT):** Designed a deep learning pipeline for modulation classification using the RadioML 2018 dataset. Compared the performance of CNN, ResNet-18, and ResNet-50 architectures. [Radio ML notebook](#)
- **Signal Separation (INPT):** Implemented the AMUSE algorithm (based on Independent Component Analysis) to separate independent source signals from mixed inputs using autocorrelation.
- **Deepfake Detection (INPT):** Developed a facial recognition system using YOLOv8 for face detection, combined with a Tkinter-based GUI to identify and flag deepfakes.
- **Plant Disease Prediction (INPT):** Built a CNN model to classify plant diseases from leaf images. Integrated the model into a real-time mobile detection app using Flutter and TensorFlow/Keras.
- **Student Management System (EST Sale):** Created a Java desktop application using JavaFX to manage academic records, integrated with a MySQL database for student registration and course tracking.
- **MPLS Operation (EST Fez – Final Project):** Studied MPLS operation in an enterprise network, focusing on intra-cloud routing and CE-PE routing using RIPV2, OSPF, EIGRP, and the MP-BGP protocol.
- **Battery Charge Indicator (EST Fez – Electronics Project):** Designed and simulated a battery level indicator using ISIS and ARES software tools for electronic circuit design.

Conferences and Publications

- **Anouar Zouhri**, Lynda Zitoune, Iyad Lahsen-Cherif. *WiFiQnA: a WiFi Dataset for Large Language Models*. Accepted at **WiMob 2025** – IEEE International Conference on Wireless and Mobile Computing, Networking and Communications.
- **Anouar Zouhri**, Douaa El Achhab, Meryeme Ayache, Nidal Nasser. *TinyFLChain: Blockchain-Secured Decentralized Federated Learning for TinyML Systems*. Accepted at **Globecom 2025** – IEEE Global Communications Conference.

Personal Qualities

- Strong collaboration and leadership skills.
- Passionate about innovation, punctuality, and teamwork.
- Curious, adaptable, and motivated by research.

Interests

Reading, video editing, hiking, graphic design, networking labs
