

Ed Holcomb

NETSUITE ADMINISTRATOR | DEVELOPER

Greater Boston | +1(774)3662944 | luckybird0614@gmail.com | [Linkedin](#)

SUMMARY

NetSuite Administrator, Developer, and ERP Consultant with 10+ years of experience delivering **NetSuite ERP** customizations, workflow automation, reporting, and integrations across eCommerce, logistics, manufacturing, and healthcare environments. Hands-on with **SuiteScript 1.0/2.x**, **SuiteFlow**, **SuiteTalk REST/SOAP**, RESTlets, SuiteAnalytics, NSAW, OneWorld, WMS, OMS, SDF, and middleware including Celigo, Dell Boomi, and MuleSoft. Functional knowledge of **Order-to-Cash**, **Procure-to-Pay**, inventory, fulfillment, AP/AR, financial reporting, and multi-subsidiary operations, with experience translating requirements into scalable solutions, supporting testing and deployment, and resolving technical issues throughout the SDLC. Background includes full-stack development and microservices for high-traffic eCommerce and business applications.

SKILLS

- **NetSuite ERP & OMS:** NetSuite OneWorld, Order Management Systems, order lifecycle support, fulfillment, Inventory Management, WMS, Multi-Subsidiary Management, multi-location operations, User Roles & Permissions, CSV Imports, Data Management
- **SuiteCloud Development & Customization:** SuiteScript 1.0/2.x, SuiteFlow, SuiteBuilder, SuiteCloud Development Framework (SDF), SuiteBundler, Custom Records, Custom Fields, Custom Forms, Client Scripts, User Event Scripts, Scheduled Scripts, Map/Reduce Scripts, RESTlets
- **ERP Business Processes:** Order-to-Cash, Procure-to-Pay, AP/AR Automation, procurement, invoicing, approvals, payment tracking, inventory control, fulfillment, vendor management, financial reconciliation, process optimization
- **Integration & API Technologies:** SuiteTalk SOAP and REST Web Services, RESTful APIs, OAuth 1.0/2.0, Token-Based Authentication (TBA), JSON, XML, CRM, billing, logistics, and third-party system connectivity
- **Middleware & Commerce Platforms:** Celigo, Dell Boomi, MuleSoft, Jitterbit, Shopify, Amazon Marketplace, Magento, WooCommerce, Salesforce, Pardot, Zoho, PayPal, Square, ShipStation, ShipRush
- **Reporting & Analytics:** Saved Searches, SuiteAnalytics, NetSuite Analytics Warehouse (NSAW), SQL reporting, Financial and Operational Reports, KPI Dashboards, Power BI, Tableau, Excel Power Query, PivotTables
- **NetSuite Administration & Deployment:** Custom Dashboards, KPIs, roles and permissions, forms and fields, approval workflows, validation rules, Sandbox Testing, UAT, SuiteApp Bundles, Sandbox-to-Production Deployment, Release Management
- **Development & Architecture:** JavaScript, TypeScript, C#, ASP.NET Core, Microservices, SQL, REST APIs, Data Modeling, Backend Architecture, System Integration, Application Performance Optimization
- **DevOps & Delivery:** Git, GitHub, Bitbucket, Azure DevOps, CI/CD concepts, environment configuration, Agile methodologies, Jira, Confluence, technical documentation
- **Collaboration:** Requirements Gathering, solution design support, stakeholder communication, production support, root-cause investigation, end-user training, cross-functional collaboration

PROFESSIONAL EXPERIENCE

CareCloud

Apr 2016 - Dec 2018

Remote

- Managed and customized **NetSuite** for healthcare business operations, including user roles, permissions, custom forms, dashboards, Saved Searches, and operational workflows.
- Built and maintained **SuiteFlow** workflows to automate finance, operations, approvals, billing, and internal request-management processes.
- Developed **SuiteScript** customizations to extend NetSuite functionality, reduce manual work, and support scalable healthcare operations.
- Created dashboards, KPI reports, and **Saved Searches** to provide real-time visibility into financial, operational, and healthcare business performance.
- Supported **AP/AR** processes, including invoicing, approvals, payment workflows, vendor management, and healthcare billing improvements.
- Collaborated with finance, operations, compliance-aware business teams, and technical stakeholders to translate requirements into practical NetSuite solutions.
- Integrated NetSuite with third-party systems and supported automation initiatives that improved data accuracy and cross-system visibility.

Forcura

Apr 2019 - Jan 2020

Remote

- Partnered with operations, finance, procurement, and administrative teams to configure NetSuite processes supporting order activity, inventory availability, vendor coordination, and financial reporting.
- Enhanced order and fulfillment visibility by integrating NetSuite with third-party platforms for synchronization of **order data**, **inventory updates**, **fulfillment activity**, vendor records, and operational transactions.

- Built **SuiteFlow** automations for vendor onboarding, purchase approvals, contract routing, and supply-procurement workflows, reducing manual follow-up across teams.
- Designed custom roles, permissions, forms, approval access, and transaction controls for finance, operations, and procurement users to improve security and usability.
- Created **Saved Searches, dashboards, KPIs, and scheduled reports** for supply planning, vendor performance, inventory forecasting, financial review, and operational decision-making.
- Improved item, vendor, and transaction data quality by identifying gaps in classifications and reporting fields, then implementing validation rules and process controls.
- Gathered and documented business requirements, supported UAT and end-user training, and coordinated rollout activities for workflow and process enhancements.
- Managed **SuiteApp bundle deployments and sandbox-to-production releases**, coordinating testing and deployment steps to minimize disruption to business operations.

Availability

Apr 2020 - Jan 2026

Remote

- Developed **SuiteScript 2.x** customizations and **SuiteFlow** automations for healthcare billing, procurement, AP/AR, and financial reconciliation, translating business rules into controlled transaction processing that reduced manual handling and improved consistency across finance operations.
- Configured and improved **Order-to-Cash and Procure-to-Pay** processes covering invoicing, approvals, payment tracking, purchasing, vendor activity, and expense workflows, working with finance and operations teams to strengthen handoffs and reporting across the transaction lifecycle.
- Customized inventory, procurement, distribution, and fulfillment processes to support medical-supply availability, vendor compliance, and multi-location inventory control, while providing clearer operational reporting for supply and purchasing teams.
- Integrated NetSuite with CRM, billing, and operational systems using **SuiteTalk REST/SOAP, RESTful APIs, JSON, and XML** patterns; investigated synchronization issues and improved cross-system visibility into orders, services, vendor activity, and financial transactions.
- Played a key role in a **NetSuite OneWorld** rollout supporting multi-subsidiary, multi-currency, and regional operations, collaborating on configuration, validation, and rollout activities as the organization expanded into new markets.
- Built **SuiteAnalytics, Saved Searches, KPI dashboards, and NSAW SQL reports** for financial review, reconciliation support, procurement, inventory usage, vendor performance, and department-level analysis, giving stakeholders timely access to operational and accounting data.
- Worked with finance, procurement, operations, and technical stakeholders to translate requirements into scalable NetSuite designs, document configurations and process changes, review solution options, and guide implementation of approved enhancements.
- Supported the full **SDLC** by analyzing workflow and data issues, identifying root causes, coordinating sandbox testing and release validation, and assisting with production support for operational, integration, and reporting problems.

EDUCATION

Touro University Nevada
Bachelor of Technology, Computer Science

Apr 2006 - Mar 2010
Henderson
