### PROFESSIONAL SUMMARY

Accomplished NetSuite Administrator and Developer with over 14 years of dedicated experience customizing, administering, and scaling Oracle NetSuite ERP (Functional & Technical) environments, supported by a 25+ year foundational background in enterprise IT infrastructure. Celigo Certified expert with verified success executing complex cloud integrations (Salesforce, HubSpot, Shopify), managing Full-Life-Cycle ERP migrations (Dynamics 365 to NetSuite), and configuring core modules (Record-to-Report, WMS, Budgeting & Planning). Advanced proficiency in SuiteScript (1.0/2.0), SuiteFlow, and 3PL logistics integrations, bridging the gap between technical infrastructure and cross-functional finance/operations teams.

### CORE COMPETENCIES & TECHNICAL SKILLS

- **NetSuite Ecosystem:** NetSuite ERP Administration, Functional & Technical Customization, SuiteScript (1.0/2.0), SuiteFlow (Workflows), Saved Searches, Custom Reports, Dashboards, Role & Permission Provisioning, Sandbox Testing, Release Management.
- **NetSuite Modules & Verticals:** Record-to-Report (R2R), Order-to-Cash (O2C), NetSuite Budgeting and Planning, RF-Smart WMS, Oracle CPQ, SuiteCommerce.
- **Integrations & iPaaS Platforms:** Celigo Integrator.io (Certified), Dell Boomi, Salesforce CRM, HubSpot, QuickBooks, Shopify, Magento, Amazon & Walmart Marketplaces, REST/SOAP Web Services.

- **IT Infrastructure & Automation:** Active Directory, Office 365, SharePoint, Windows Server, Linux (Red Hat, AIX), VMware vSphere, Splunk, ServiceNow CSM, Jira, Change Management (ITSM), SDLC, Automated UAT Testing, JAMS, Automic (UC4).

## PROFESSIONAL EXPERIENCE

**Clinisys** | Remote

*Application Administrator – NetSuite & Celigo Specialist* | May 2024 – July 2026

- Served as the primary technical NetSuite Administrator, managing account maintenance, custom roles, permissions, and security controls for global enterprise business applications.
- Engineer and deploy custom SuiteScript (1.0/2.0) solutions and SuiteFlow workflows to automate core financial processes and remove processing latency.
- Manage end-to-end data integrations between NetSuite and external applications (Salesforce, HubSpot, QuickBooks, and Oracle CPQ) using the Celigo iPaaS platform.
- Partner with 3PL logistics and warehouse vendors to automate data mapping for order-to-cash workflows, shipping fulfillment, and inventory visibility.
- Design complex saved searches, financial reports, and custom interactive dashboards tailored to executives and functional accounting teams.
- Monitor NetSuite platform health, manage twice-yearly upgrade verification, and execute automated unit testing to scale system capacity.

**MedQuest Associates | Remote**

*Oracle NetSuite Administrator (Contract) | November 2023 – April 2024*

- Administered the daily operations, system security, and data governance of the NetSuite ERP ecosystem within a regulated healthcare corporate environment.
- Developed SuiteScript automation scripts that accelerated the customer record onboarding cycle and optimized financial reporting time blocks.
- Created, maintained, and audited NetSuite reports, custom KPIs, and dashboards to track critical corporate financial metrics.
- Aligned internal NetSuite workflows with 3PL logistics networks to establish continuous inventory and distribution data synchronization.
- Audited and locked down NetSuite configurations to enforce absolute data privacy compliance under strict HIPAA and HITECH healthcare statutes.

**Astec Industries LLC | Remote**

*NetSuite Administrator (Contract) | March 2023 – October 2023*

- Orchestrated a full-lifecycle software migration from Microsoft Dynamics 365 to NetSuite ERP, including layout design, general ledger mapping, and CRM integration setup.
- Acted as the definitive financial NetSuite SME during the scoping, deployment, and optimization of the NetSuite Budgeting and Planning module.
- Built real-time data sync bridges using custom email alerts and SuiteScripts to connect NetSuite with 3PL providers and warehouse management systems.

- Authored deep technical documentation, system validation workflows, and operational training guides to govern standard NetSuite troubleshooting steps.

**Body Art Alliance (BAA) | Remote**

*Senior System Integration Specialist (NetSuite Functional/Technical Admin) | May 2022 – February 2023*

- Designed, script-tested, and deployed scalable ecommerce integration architecture using Celigo to link NetSuite ERP with Shopify, Magento, Amazon, and Walmart.
- Led technical NetSuite implementations involving RF-Smart WMS integrations, custom database schemas, and a full Record-to-Report (R2R) financial modules rollout.
- Programmed custom JavaScript-based SuiteScripts to optimize processing scripts and automate legacy manual data entry loops.
- Performed exhaustive User Acceptance Testing (UAT) and regression testing in NetSuite Sandbox environments prior to pushed production deployments.
- Provided escalated infrastructure support across mixed Windows/Linux environments hosting connected enterprise tools (SharePoint, Teamcenter CAD).

**Johnson Supply | Houston, TX**

*Senior Integration Analyst II – NetSuite Admin | July 2020 – April 2022*

- Configured custom user roles, environment permissions, and automated data entry paths inside the core NetSuite ERP framework.

- Architected custom SuiteFlow tracking schemas and built technical configurations for the RF-Smart WMS inventory management platform.
- Evaluated old system builds, designed custom feature workarounds, and coordinated smooth patch updates across the operational network.
- Maintained Active Directory access permissions, enterprise Splunk monitoring platforms, and Microsoft Office 365 user provisioning.

**KBR** | Houston, TX

*Senior QA Analyst / Integration Specialist (NetSuite Admin) (Contract)* | August 2019 – April 2020

- Architected and built targeted NetSuite customizations leveraging SuiteScript 1.0/2.0, SuiteTalk, SuiteFlow, and SuiteCloud frameworks to maximize cross-departmental usability.
- Formulated QA automation test plans, scripts, and validation matrices within Application Lifecycle Management software to safeguard system stability.
- Ensured deep-tier system integrations flowing into NetSuite Finance modules sustained high scalability and accurate data mapping from ecommerce portals.
- Supported backend Active Directory environments, Microsoft Exchange server upgrades, and cloud infrastructure transitions to Azure.

**CenterPoint Energy** | Houston, TX

*Application Support Analyst (Contract)* | February 2019 – July 2019

- Provisioned technical software support and environment configurations for an enterprise footprint of over 1,500 active infrastructure end-users.

- Executed backend multi-server migrations from legacy SQL Server environments to SQL Server 2016, and facilitated vCloud-to-NetSuite cloud migrations.
- Authored SQL Server Reporting Services (SSRS) queries and data visual models utilizing Rapid SQL 2016 and Tableau to empower corporate finance teams.
- Managed change management schedules and data access requests within the corporate ServiceNow ITSM environment.

#### **DHI Telecom Group** | Houston, TX

*Lead System Administrator / Team Lead (NetSuite) (Contract)* | August 2018 – January 2019

- Directed daily technical operations and configuration matrices for the core NetSuite footprint, configuring third-party integrations and deploying R2R modules for new global subsidiaries.
- Supervised a cross-functional squad of IT technicians managing large-scale enterprise operating system hardware updates.
- Automated Active Directory account generation pathways and system management rules utilizing deep PowerShell scripting.
- Maintained operational health across 200+ physical and virtual infrastructure servers running Solaris, Unix, Linux, and Windows Server configurations.
- Introduced UC4/Automic automation architectures to streamline scheduled database processes, and migrated production web services to AWS using Terraform.

#### **Symmetrix Solutions** | Houston, TX

*Support System Engineer / Technical Support Lead / Project Manager* | May 2017 – July 2018

- Led a team of 6 Technical Support Engineers through complex infrastructure projects, including large-scale Windows migrations, cloud adoptions (AWS/Azure), and Active Directory integrations.

- Orchestrated multi-tier software movements, seamlessly transitioning core NetSuite ERP platforms and migrating shared business files from Citrix ShareFile to SharePoint Online.

**Harris County Public Health & Environmental Services** | Houston, TX

*Windows System Administrator* | August 2016 – April 2017

- Provisioned, configured, and maintained virtual machines, enterprise storage datastores, and production servers leveraging the VMware vSphere environment.
- Enforced server security hardening protocols, audited firewall policies, and administered the health of the internal corporate SharePoint portal.

**Walt Disney Parks and Resorts** | Houston, TX (Remote)

*Linux/Windows System Engineer / Technical Support (NetSuite/UC4 Atomic)* | May 2015 – May 2016

- Managed the dedicated internal NetSuite helpdesk, building saved searches, reporting dashboards, and debugging granular role permission hierarchies.
- Architected an enterprise production batch-scheduling matrix using Atomic/UC4 tools to optimize automated backend data delivery routines.
- Partnered directly with corporate business groups to validate incoming patches to the production NetSuite environment and hosted software training programs for accounting teams.

**MD Anderson Cancer Center** | Houston, TX

*System Analyst II* | September 2014 – May 2015

- Designed and expanded log aggregation tools using Splunk and administered large-scale EMC enterprise storage arrays to eliminate performance bottlenecks.
- Governed nightly enterprise infrastructure backup routines using Tivoli Storage Manager (TSM) alongside automated snapshots inside VMware vSphere.

**Academy Sports and Outdoors** | Houston, TX

*Senior System Automation Administrator / Project Manager / NetSuite Admin* | May 2011 – September 2014

- Directed the configuration, development, customization, and regression testing pipelines for the enterprise NetSuite ERP environment.
- Designed complex real-time integrations to connect NetSuite with external data streams, generating custom executive visual dashboards and finance KPIs.
- Automated system routines using Java and PowerShell, and resolved multi-tier architecture issues across iSeries, Citrix, Exchange, and Linux platforms.

**Paychex** | Rochester, NY

*System Administrator / Technical Support Lead* | November 2006 – May 2011

- Administered user environments, configured software access matrices, and provided escalation-level technical infrastructure troubleshooting.

**Xerox Corporation** | Rochester, NY

*QA Software Tester* | November 2005 – November 2006

- Authored and executed software validation scripts, identified architectural application bugs, and certified code fixes during pre-production testing.

**IBM Global Services** | Rochester, NY

*System Administrator / Project Manager / Data Center & Call Center Manager* | June 1996 – July 2005

- Managed complete data center hardware operational lifecycles, directed server infrastructure technicians, and oversaw complex multi-tier project schedules.

## **EDUCATION & CERTIFICATIONS**

**Newbury College** | Brookline, MA

*Bachelor's Degree in Mass Communications* | May 1998

- **Celigo Integration Certified Professional – (Last Received in 2026)**
- **Oracle NetSuite Certified Administrator – (Received in 2014)**
- **Microsoft Certified Professional (MCP)**
- **ServiceNow Certified System Administrator (Received in 2019)**
