PROFESSIONAL EXPERIENCE & ACCOMPLISHMENTS

HIGHSPRING | Charlotte, NC

7/2022 – 2/2026

SOLUTION ARCHITECT

Solution Architect leading the Supply Chain Practice for secondary solutions, specializing in implementing multiple planning modules for mid-market clients.

- Serve as a technical pre-sales leader, gathering client requirements and demonstrating advanced planning systems to showcase business value and drive adoption.
- Conduct discovery sessions and demos to align customer pain points with scalable platform features
- Lead end-to-end implementations of Demand and Supply Planning modules, integrating advanced supply chain systems tailored to mid-market client needs
- Act as a trusted advisor to clients by designing and delivering innovative solution architectures that address complex planning and operational challenges.
- Collaborate across cross-functional teams to provide training, technical support, and post-implementation solutions, strengthening client relationships and long-term satisfaction.

ENVISTA | Charlotte, NC

1/2022 – 7/2022

SENIOR MANAGER

Senior Manager in the Planning Strategy practice leading the Supply Chain implementation practice.

- Led the Supply Chain Implementation Practice, combining technical presales expertise with hands-on delivery of supply chain planning system implementations (Vanguard/Tagetik SCP/Blue Yonder).
- Collaborated with stakeholders to provide product demonstrations, articulate solution value, and build trust during the presales process.
- Managed and coached team of functional and technical resources in implementing various planning solutions.
- Support planning team as a project manager by assisting in creating SOWs, managing projects budgets, scope, and schedules.

MANAGER | 10/2020 – 1/2022

Manager in the Planning Strategy practice specializing in Supply Chain implementations through various advanced planning systems in both Demand and Supply.

- Manage detailed data analysis for various clients around inventory modeling and optimization, lead time analysis, lost sales, and network flow mapping.
- Support planning team as a project manager by assisting in managing projects budgets, scope, and schedules.

CAPGEMINI (BOEING Aerospace & Defense) | Charlotte, NC

2/2019 – 4/2020

MANAGER

Provided strategic oversight and ownership of project functions as co-lead in the implementation of inventory optimization for Service Parts Management and an end-to-end middleware solution used to transform and streamline data from several legacy systems to optimize supply planning for a global inventory.

- Actively led and participated in large Agile Scrum calls with functional and technical teams to develop and design inventory positions and master data through an agile framework.

JARED COLE

Charlotte, NC 28205 | (814) 450-1147 | jared.d.cole@gmail.com

- Reverse engineered a complex outbound interface design with legacy government systems that was redeveloped on a new middleware platform.

COCA COLA BOTTLING COMPANY CONSOLIDATED (CCBCC) | Charlotte, NC

11/2016 – 2/2019

LEAD BUSINESS ANALYST

Lead business analyst on a large reimplementation of JDA and conversion of Legacy SAP to centralized shared service of SAP, and SME for transactional/master data for JDA and SAP.

- Supported QA team on testing around JDA and provided expertise as technical liaison between business partners and development team.
- Assisted with data mapping from SAP to JDA and maintained requirements for middleware software.

SIGNATURE CONSULTANTS | Charlotte, NC

5/2016 – 11/2016

JDA CONTRACTOR

Consulted and assisted with the migration of multiple internally hosted JDA instances to the cloud, including providing both functional and technical support to business users.

- Worked with business partners to gather and document business requirements and assisted with translating business requirements to the technical team.
- Developed JDA training for technical users and provided on-call production support.

MEBC GLOBAL | Reading, PA

10/2012 – 5/2016

SR. TECHNICAL ANALYST | 8/2013-5/2016

Assisted in the architecture, product development, and delivery of MEBC's cloud hosting and managed services for JDA software, HP Enterprise Solutions, and other point business systems.

- Managed multiple internal/client implementation projects and co-lead MEBC's adoption of cloud-based technology solution for internal development programs, JDA project implementations, and client hosted business systems.
- Created reports through Cognos BI/ Configuring Framework Manager and performed PL/SQL and XML coding of scripts/batch processes/data manipulation.
- Met with clients to help resolve technical/functional issues including JDA Software, Oracle, Cognos.
- Tested technical designs/batch processes to functional requirements and tweaked code as needed.
- Explained changes in code/technical design to functional consultants/clients.
- Maintained client's databases, applications, and servers.

ANALYST | 10/2012-8/2013

Provided JDA technical and functional support including testing, configuring, and documenting of JDA instances and documentation of client's unique planning environment.

- Played a key role in the implementation of JDA Software for an international client.
- Instrumental in project management of developing Master Data Services (MDs).
- Collaborated with buyers, planners, and suppliers to help implement business processes for various clients.

LANTEK | Pittsburgh, PA

3/2012 – 10/2012

CONSULTANT-UPMC | 3/2012-10/2012

Consulted with client and provided solutions to infrastructure need including implementing both hardware and software upgrades.

- Configured dated software to work with newer OS.
- Deployed PC's to various sites and educated employees on operating new PCs.

EDUCATION

Bachelor of Science, Business Technology Support and Training, Indiana University of Pennsylvania
