

KEVIN KHAN

NetSuite Solutions Architect | AI/ERP Integration Specialist

(347) 304-7667 • kevinryankhan@gmail.com • linkedin.com/in/kevin-khan

PROFESSIONAL SUMMARY

NetSuite Solutions Architect with 10+ years of hands-on experience designing, optimizing, and stabilizing complex, heavily customized NetSuite environments — now applying that depth to a rare specialty: integrating production AI capabilities into enterprise ERP. Expert-level SuiteScript 1.0/2.x developer with a track record of refactoring brittle quick-fix customizations into scalable, maintainable solutions: a 300,000+ record zero-loss ERP migration, 15+ third-party integrations, and automation saving 400+ hours annually. Currently architecting AI-augmented ERP audit tooling at Strikaris LLC using Anthropic Claude, LangGraph multi-agent orchestration, and AWS Bedrock — bridging the gap between traditional ERP consulting and the agentic AI systems enterprises are adopting now. Pursuing Anthropic Claude Certified Architect (CCA-F) and NetSuite SuiteFoundation certifications.

CORE COMPETENCIES

AI/ERP Integration	AI service integration in enterprise ERP contexts — AWS Bedrock + Anthropic Claude for NetSuite document processing; LangGraph multi-agent orchestration; AI-augmented audit and static analysis for SuiteCloud environments; Anthropic Academy coursework (CCA-F track)
SuiteScript	SuiteScript 2.x (2.0, 2.1) and 1.0 — RESTlets, User Event, Client, Suitelet, Scheduled, Map/Reduce; 1.0 → 2.x migration and refactoring
NetSuite Admin	System configuration, roles & permissions, SuiteFlow workflows, saved searches, custom records, sandbox/production management, SuiteCloud Development Framework (SDF)
Integration	RESTful API design, cloud-native integration architecture, AWS (Lambda/Kinesis/CDC/Glue/EventBridge), Magento 2, Celigo Integrator.io, JIRA, HubSpot, Freshdesk, SharePoint
ERP Migration	Led Acumen-to-NetSuite migration — 300,000+ records across products, customers, and transaction history with zero data loss
Architecture	Scalable process design, script dependency reduction, environment review & optimization, TOGAF-aligned documentation, PlantUML
Full-Stack	JavaScript (ES6+), TypeScript, Python, PHP, Java, SQL; React/Redux, Vue.js, Next.js, Laravel, Node.js; MySQL, PostgreSQL, SQL Server; SuiteAnalytics & KPI dashboards

PROFESSIONAL EXPERIENCE

Strikaris LLC — Principal Architect & Co-founder (Remote) Oct 2025 – Present

- Architecting NetSuite Audit Service — AI-augmented static analysis of SuiteCloud Development Framework projects for consulting shops and organizations with heavily customized NetSuite environments; surfaces technical debt, governance gaps, and refactoring opportunities
- Building developer tooling in Python and Node.js, combining SDF static analysis with AI-augmented review patterns powered by Anthropic Claude
- Prototyping multi-agent orchestration patterns using LangGraph and Claude for NetSuite developer-ops automation
- Producing service definitions, scoping templates, and TOGAF-aligned reference architecture documentation for client engagements

Benchmark Education Company — Kissimmee, FL (Remote) / New Rochelle, NY Mar 2015 – Feb 2026

Progressed from Data Specialist to Solutions Architect over 10 years as the primary NetSuite technical authority for a leading educational publisher — owning the full NetSuite technical environment, customization, automation, and 15+ third-party integrations.

Solutions ArchitectOct 2021 – Feb 2026

- Conducted architecture and feasibility analysis for AI-driven Customer PO Automation using AWS Bedrock with Anthropic Claude — produced design documentation and surfaced integration constraints around authentication, streaming, and agent orchestration
- Architected 15+ NetSuite customizations and integrations including Bundle Pricing Automation (eliminated manual maintenance of 1,000+ pricing records, saving 400+ hours/year), Customer PO Processing, and real-time data synchronization across finance, operations, and sales
- Designed NetSuite-to-Magento 2 bi-directional integration for products, inventory, orders, and customer data via RESTful APIs
- Built event-driven AWS pipeline (Lambda, Kinesis, CDC, EventBridge) syncing NetSuite with HubSpot and Freshdesk in near-real-time
- Migrated and refactored 20+ SuiteScript 1.0 customizations to 2.x — reducing script execution errors and improving stability
- Led Identity and Access Governance evaluation for Microsoft Entra ID across 9+ systems (NetSuite, Jira, Confluence, GitHub, AWS, HubSpot, Workday) — defining role boundaries, access reviews, and lifecycle automation
- Evaluated and integrated third-party SuiteApps including Validis DataShare for controlled external-auditor data access; mentored engineers on SuiteScript best practices; produced TOGAF-aligned architecture documentation

Technical LeadMar 2019 – Oct 2021

- Led team of 3–4 engineers on NetSuite integrations and corporate applications; served as Scrum Master
- Architected Operational Data Store (ODS) with RESTful APIs for real-time NetSuite data synchronization; implemented AWS Glue + Lambda pipeline for automated NetSuite CRUD via SuiteTalk
- Tech-led Themis (React/Redux internal ITSM app) integrated bidirectionally with NetSuite via SuiteScript 2.x RESTlets; provided full-stack oversight on PD Scheduling (Laravel/React/MySQL) built by an offshore vendor team

Associate Software EngineerMar 2017 – Mar 2019

- Built MIA, a NetSuite-integrated metadata management application (Vue.js, Laravel, MySQL) — owned the NetSuite integration layer end-to-end via SuiteScript 2.x RESTlets and bidirectional sync logic
- Led SuiteScript 1.0 → 2.x migration across the NetSuite account; built SuiteFlow workflows for JIRA-NetSuite synchronization

Data SpecialistMar 2015 – Mar 2017

- Led Acumen-to-NetSuite ERP migration — cleaned and transformed hundreds of thousands of records using Excel VBA and Access SQL; designed CSV import strategies and automated Saved Search alerting for finance, sales, and operations

Center for Children's Initiatives — Database Assistant, New York, NY2013 – 2015

- Developed Excel VBA automation reducing manual data processing time by 70%; maintained SQL databases and supervised data entry interns

KEY ACHIEVEMENTS

- 300,000+ records migrated from Acumen to NetSuite with zero data loss across products, customers, and transactions
- 400+ hours saved annually via Bundle Pricing Automation — eliminating high-frequency manual CSV maintenance
- 15+ NetSuite integrations architected across Magento 2, AWS, JIRA, HubSpot, and Freshdesk; led iPaaS-to-cloud-native transition

- 20+ SuiteScript 1.0 customizations refactored to 2.x — improving stability and reducing technical debt

EDUCATION & CERTIFICATIONS

- B.S., Computer Information Systems — DeVry College of New York (2014–2017)
- A.S., Business Office Administration — Wood Tobe-Coburn School (2011–2012)
- Anthropic Claude Certified Architect, Foundations (CCA-F) — In Progress 2026 (Anthropic Academy coursework underway)
- NetSuite SuiteFoundation Certification — In Progress 2026
- NetSuite Administrator Certification — In Progress 2026
