SUMMARY

NetSuite Integration Developer with 7+ years of experience designing and delivering scalable iPaaS, ERP, and SaaS integration solutions across NetSuite, Salesforce, Shopify, Amazon, and cloud platforms. Experienced in building production-grade integrations using Celigo integrator.io, REST/SOAP APIs, JavaScript, OAuth, JSON/XML transformations, and middleware architectures, with strong expertise in client-facing implementation, troubleshooting, automation, and AI-enabled integration workflows.

SKILLS

Integration & iPaaS Platforms: Celigo integrator.io, Celigo Flows, Middleware Architecture, Dell Boomi, MuleSoft, Jitterbit, Apache Camel, Zapier, Make, n8n, API Management, Integration Monitoring, Error Handling

ERP & SaaS Integrations: NetSuite ERP, Salesforce, Shopify, Amazon, HubSpot, Magento, WooCommerce, BigCommerce, eBay, Stripe, PayPal, WMS, CRM Platforms, Ecommerce Platforms

API Development & Security: REST APIs, SOAP Web Services, RESTlets, SuiteTalk, Webhooks, API Lifecycle Management, Endpoint Design, Authentication, OAuth 1.0/2.0, Token-Based Authentication (TBA), API Governance

Data Transformation & Processing: JSON, XML, CSV, EDI, Flat Files, Data Mapping, Data Normalization, ETL, Data Validation, Data Migration, SQL, Data Modeling

NetSuite Development & Customization: SuiteScript 2.x, SuiteFlow, SuiteBuilder, SuiteAnalytics, SuiteQL, Saved Searches, Custom Records, Workflows, SDF, Sandbox & Production Deployments

Automation & AI Integration: AI-Powered Automation, LLM Integration Patterns, Intelligent Workflows, AI Agents, Prompt Design, Agentic Automation Concepts, MCP Server Architecture

Development & DevOps Tools: JavaScript, Node.js, Git/GitHub, Jira, Confluence, CI/CD, Release Management

PROFESSIONAL EXPERIENCE

JAYEL CLOUD

Yorktown Heights, NY

NetSuite Developer/Administrator

Jul 2025 – Jun 2026

Contract, Remote

- Designed and delivered scalable Celigo integrator.io integration solutions connecting NetSuite ERP with Salesforce, Shopify, Amazon, and third-party SaaS platforms, improving automated data exchange across finance, sales, ecommerce, and operations teams.
- Built and optimized Celigo integration flows including data imports, exports, scheduled synchronizations, error handling, and transformation logic using JavaScript hooks, JSON mapping, CSV processing, and API-based integrations.
- Developed secure REST and SOAP integrations using NetSuite RESTlets, SuiteTalk, OAuth 2.0, and token-based authentication, enabling reliable communication between ERP systems and external business applications.
- Designed complex data mappings and transformation processes between NetSuite and external systems, ensuring accurate synchronization of customers, orders, inventory, invoices, payments, and financial transactions.
- Collaborated directly with business stakeholders and technical teams to gather integration requirements, define solution architecture, document workflows, and deliver production-ready automation solutions.
- Implemented automated reconciliation processes between NetSuite and external financial platforms, improving data accuracy and reducing manual validation efforts during accounting operations.
- Built custom SuiteScript 2.x automation and integration utilities to support business workflows, including transaction processing, validation rules, scheduled jobs, and API orchestration.
- Provided end-to-end integration support throughout the delivery lifecycle, including design, development, testing, deployment, troubleshooting, go-live assistance, and post-production optimization.
- Developed monitoring and troubleshooting processes for integration failures by analyzing API responses, Celigo execution logs, NetSuite script logs, and data synchronization issues.
- Supported ecommerce and marketplace integrations by synchronizing product catalogs, pricing, inventory availability, sales orders, and fulfillment information across Shopify, Amazon, and NetSuite environments.

- Created technical documentation, integration specifications, mapping documents, and knowledge transfer materials to support customer training and long-term platform adoption.
- Explored AI-enabled automation opportunities using LLM integration patterns, intelligent workflows, and agent-based automation concepts to improve business process orchestration and operational efficiency.

KENDRA SCOTT

NetSuite Developer/Administrator

Yorktown Heights, NY

Jan 2025 – Jun 2025

Contract, Remote

- Troubleshoot and resolved all NetSuite issues including scripts, workflows, reports and dashboards.
- Managed role-based permissions, user access and workflow configurations, streamlined operations across finance, procurement and sales teams.
- Collaborated with finance teams to improve reporting processes using SuiteAnalytics and custom reports to enhance visibility into KPIs.
- Provided training and technical support to users on NetSuite modules and features.
- Developed RESTlet-based APIs for integrating external services like CRM and inventory systems, enabling real-time two-way communication with NetSuite.

CEI

NetSuite Developer

San Francisco, CA

Mar 2023 – Dec 2024

Contract, Hybrid

- Developed SuiteScript 2.0 automations to streamline complex approval chains, billing schedules and procurement workflows across client accounts.
- Built custom React portals integrated with NetSuite via RESTlets and OAuth 2.0, enabling real-time client-side access to inventory, order tracking and invoice data.
- Customized SuiteFlow and SuiteBuilder configurations for multi-subsidiary clients, supporting region-specific tax, currency and operational rules.
- Integrated NetSuite with Salesforce, Shopify and third-party logistics platforms using Celigo and TBA, ensuring seamless data exchange and order visibility.
- Designed custom SuiteAnalytics dashboards and SuiteQL-powered reports for finance and operations teams to visualize trends and monitor exceptions.
- Built scheduled SuiteScript processes to reconcile transactions between NetSuite and external financial systems such as QuickBooks and Concur, ensuring consistent GL balances and reducing manual verification during monthly close.
- Developed a modular SuiteScript library and standard SDF deployment template to support rapid implementation of common customizations across client accounts, such as form validations, and RESTlet authentication flows.

ACTIVISION BLIZZARD

NetSuite Developer

San Francisco, CA

Sep 2022 – Feb 2023

Contract, Hybrid

- Built and customized NetSuite features to align with the organization's unique requirements.
- Created comprehensive functional design and specifications documents that capture workflow processes.
- Collaborated with Consulting/Business Analyst teammates for translating client requirements into software designs, technical approaches and estimates.
- Documented business objectives, use cases, business requirements, system specifications, workflows and process documentation.

UPWORK

Frontend & NetSuite Developer

Los Angeles, CA

Jan 2019 – Jul 2022

Part-time, Remote

- Built responsive frontend interfaces using HTML/CSS, JavaScript and React framework to enhance user experience and data visualization.
- Developed a custom NetSuite-Stripe checkout integration solution.
- Developed, tested and deployed solutions for integration with Salesforce using Celigo, reporting variances and systematic gaps.

EDUCATION

CLARION UNIVERSITY OF PENNSYLVANIA

Clarion, PA

Bachelor of Technology in Computer Science
