

PRATHYUSHA REDDY

NetSuite Developer & Administrator / Celigo Integration Specialist

Atlanta, GA • 470-588-9630 • prathyusha05.net@gmail.com • [LinkedIn](#)

Professional Summary

Senior NetSuite Developer & Administrator, Celigo Integration Specialist with 6+ years of hands-on experience delivering scalable ERP solutions, iPaaS integrations, and workflow automation. Deep expertise in SuiteScript 1.0/2.0, SuiteFlow, SuiteTalk, and Celigo Integrator.io. Proven track record implementing end-to-end Order-to-Cash (O2C) and Procure-to-Pay (P2P) processes, bidirectional Salesforce–NetSuite sync, and 3PL/eCommerce integrations (Salesforce, Magento, SFTP, shopify, Trove). Skilled at migrating legacy scripts, reducing manual data entry through automation, and driving UAT across cross-functional teams. NetSuite OneWorld experience.

Core Competencies

SuiteScript 1.0 / 2.0	SuiteFlow (Workflows)	SuiteTalk (SOAP/REST)	SuiteAnalytics
SuiteBuilder	Order-to-Cash (O2C)	Celigo Integrator.io	REST API / RESTlets
SOAP Web Services	NetSuite OneWorld	SuiteBundler	Procure-to-Pay (P2P)
Salesforce Integration	MuleSoft iPaaS	EDI / TrueCommerce	3PL / WMS
Magento / eCommerce	JavaScript / HTML / CSS	SQL (MySQL / Oracle)	Data Migration
UAT / QA	Agile / Scrum	Saved Searches & KPIs	SuiteCloud Dev Framework

Professional Experience

NetSuite Developer | Admin | Celigo | Lovesac

May 2023 – Present

Atlanta, GA

- Designed and deployed Celigo (Integrator.io) integration workflows connecting NetSuite with Salesforce, SFTP, Trove, Coupa, Concur, SAP, and Magento using SuiteScript (1.0 & 2.0), automating data exchange and reducing manual entry errors by a significant margin.
- Designed and built end-to-end real-time and batch Celigo integration flows for orders, customers, and inventory, ensuring reliable data sync across all business systems.
- Managed and resolved user issues through Jira ticketing system, providing both technical and functional support for NetSuite and integrated applications.
- Worked directly with business users to gather requirements, troubleshoot issues, and provide solutions related to O2C, P2P, Finance, and Inventory processes.
- Migrated legacy SuiteScript 1.0 scripts to SuiteScript 2.0 (Map/Reduce, User Event, and Scheduled), improving platform performance and long-term scalability.
- Developed custom Purchase Order auto-approval workflows using SuiteFlow, cutting approval cycle time and reducing bottlenecks.
- Built and maintained NetSuite Saved Searches, KPI dashboards, and advanced reports, improving visibility into financial and operational data.
- Performed NetSuite User Access Review (UAR) SOX audit Compliance and enforced role-based permission governance for compliance.
- Executed data mapping, transformation, and validation for cross-system integration pipelines, ensuring accuracy and reliability.
- Resolved NetSuite integration failures, script errors, and data sync issues proactively to maintain 24/7 operational continuity.
- Automated promotions, discounts, and business process workflows using Celigo scripting integrated with NetSuite.

- Collaborated with Finance, Operations, and IT stakeholders to gather requirements and implement scalable NetSuite solutions.

NetSuite Developer | Admin | Agway

Jul 2021 – May 2023

Atlanta, GA

- Configured and optimized Order-to-Cash (O2C) and Procure-to-Pay (P2P) processes in NetSuite, streamlining month-end close and improving financial data accuracy using SuiteScript and MySQL.
- Implemented bidirectional Salesforce–NetSuite integration via REST API, enabling real-time sync of accounts, contacts, and customer records across both platforms.
- Managed EDI integration with True Commerce and executed a platform switchover to Celigo, modernizing data exchange operations.
- Executed data cleanup and full migration from Epicor ERP to NetSuite, ensuring data integrity and business continuity.
- Developed NetSuite workflows for sales order approvals, credit memos, and purchase order approvals using SuiteFlow.
- Built advanced PDF/HTML templates (PO, Invoice, Credit Memo) using HTML, AJAX, CSS, and JavaScript for professional document generation.
- Integrated eCommerce ERP with UPS and 3PL systems, improving shipping workflows and fulfillment accuracy.
- Managed WMS day-to-day operations, including pick-and-pack processes, barcode scanning, and inventory control.
- Created and maintained user profiles, role hierarchies, page layouts, workflow alerts, and password policies in NetSuite.
- Led User Acceptance Testing (UAT) for all customizations, validating functionality against business requirements before production deployment.

NetSuite Developer | Admin | Wissen Infotech

April 2021 – Jul 2021

Wisconsin

- Executed eCommerce-to-NetSuite integration using MuleSoft iPaaS, enabling seamless connectivity between platforms.
- Developed SOAP and REST Web Service consumer and provider solutions for external system integrations via SuiteTalk.
- Built RESTlet scripts to integrate NetSuite with legacy systems using NLAAuth and OAuth 2.0 authentication.
- Generated accurate invoices using MRP and managed end-to-end Accounts Receivable cycles.
- Used SuiteBundler to package and deploy NetSuite customizations from the sandbox to production environments.
- Exported and imported data across multiple formats (CSV, TSV, Excel, XML, JSON, XLSX, DAT) for data management.
- Developed workflows for sales order approvals and credit memo approvals using SuiteScript and SuiteFlow.
- Administered NetSuite user profiles, role hierarchies, permissions, and password policies to ensure secure access control.

NetSuite Developer | Admin | RMSI

May 2016– Nov 2020

India

- Delivered NetSuite ERP customizations across SuiteScript, SuiteBuilder, SuiteBundler, and SuiteFlow for multiple business units.
- Wrote SuiteScript 1.0 and 2.0 scripts, including Client Scripts, User Event Scripts, and Scheduled Scripts for custom business logic.
- Implemented SuiteTalk SOAP-based XML web services for data exchange with external enterprise applications.
- Created advanced PDF/HTML templates using HTML, AJAX, CSS, and JavaScript for transactional documents.
- Used SuiteBundler to reliably deploy customizations from the sandbox to production with version control.
- Supported end-user requests for saved searches, KPI dashboards, and reports, and administered roles and access policies.
- Conducted UAT for all NetSuite customizations, ensuring quality, compliance, and stakeholder sign-off.
