## Professional Summary

---

Dynamic NetSuite Technical Consultant with 5 years of experience in designing, developing, and optimizing complex customizations on the NetSuite platform. Demonstrated expertise in SuiteScript, SuiteFlows, and integrations, with a strong ability to troubleshoot and enhance system performance while translating business needs into robust technical solutions.

## Work Experience

---

### NetSuite Techno-Functional Consultant

**COLOGIX** | USA

July 2024 to Present

- Designed, built, and deployed complex NetSuite customizations including SuiteScript 2.x User Event, Scheduled, and Map/Reduce scripts to automate network asset and billing processes
- Developed Custom Record Types and Suitelets to extend NetSuite OneWorld for Network Inventory Management, enhancing operational visibility
- Engineered secure integrations between NetSuite and third-party systems using RESTlets, REST/SOAP Web Services, OAuth 2.0, and middleware platforms
- Delivered SuiteFlow workflows for inventory allocation and approval routing, optimizing Order-to-Cash and Procure-to-Pay cycles
- Troubleshoot and resolved complex transactional issues across workflows, scripts, and configurations to ensure business continuity
- Led client meetings to gather requirements, prioritize enhancements, and maintain stakeholder satisfaction across multiple markets
- Managed project deliverables and sprint planning using Jira, coordinating with internal and client teams
- Configured multi-subsidiary and multi-currency structures to support consolidated financial reporting and intercompany eliminations
- Delivered SuiteAnalytics reports and dashboards for executive review, supporting financial and operational decision-making
- Led bi-annual NetSuite upgrade preparations including impact assessments, regression testing, and release preview validation
- Provided system administration support including role-based access control and SOX compliance assistance
- Executed data imports and migrations to onboard new markets and consolidate legacy records
- Conducted User Acceptance Testing, end-user training, and created documentation to support adoption of custom features

## NetSuite Systems Administrator & Analyst

Accenture | India

June 2021 to July 2023

- Configured and maintained event-based revenue recognition rules and revenue arrangements in NetSuite Advanced Revenue Management (ARM) to support month-end close and audit reporting
- Assisted in developing and troubleshooting SuiteScript workflows and Suitelets to standardize data entry and automate reporting processes
- Supported daily NetSuite operations including AR, AP, GL, and revenue recognition functional support
- Created and updated Saved Searches and financial reports, adapting to audit feedback and evolving business needs
- Executed Mass Update Scripts and CSV imports for data cleansing and master record maintenance
- Assisted with role and permission assignments, supporting RBAC and access control compliance
- Participated in User Acceptance Testing cycles and documented support tickets to meet compliance standards
- Supported Sandbox refreshes and bi-annual upgrade readiness by validating configurations and workflows
- Assisted with integration testing of RESTlets and Suitelets for client-side data exchange
- Helped build and maintain dashboards and KPI portlets in SuiteAnalytics Workbook for finance and operations teams

## Education

---

### Computer Science (Master)

Saint Francis College | New York, NY

July 2023 to July 2025

### Computer Science (Bachelor's)

Veltech University | Chennai, Tamil Nadu

June 2019 to July 2023

## Skills

---

**SuiteScript 1.0/2.x/2.1 (User Event, Scheduled, Map/Reduce, RESTlet, Suitelet)** **SuiteFlow** **SuiteTalk**  
**JavaScript (ES6+)** **NetSuite OneWorld Multi-Subsidiary & Multi-Currency Configuration** **NetSuite**  
**Advanced Revenue Management (ARM)** **NetSuite Custom Record Types and Suitelets Development**  
**NetSuite Integrations (RESTlets, REST/SOAP Web Services, OAuth 2.0, Token-Based Authentication)**  
**SuiteAnalytics Workbook and Saved Searches** **NetSuite System Administration and Role-Based Access**  
**Control (RBAC)** **User Acceptance Testing (UAT)** **Jira Project & Sprint Tracking** **Data Migration and**  
**CSV Imports** **Troubleshooting and Debugging NetSuite Customizations** **NetSuite Upgrade Preparation**  
**and Release Preview Testing**
